

Discussion Task Round 2

You are a centrist government think tank who has been tasked with analyzing the pros and cons of American Isolationism.

As you discuss this topic, make sure to discuss isolationism in relation to the following three issues: the American economy, global security threats, and humanitarian concerns.

Be prepared to provide a brief summary for members of Congress on each subtopic and make a recommendation about isolationism as a whole. Should the United States make greater efforts to work with other countries in the world, or should the government take a more isolationist approach?
